

# The Best Compressor for CO<sub>2</sub>?

## Kobelco Captures Performance

For various CO<sub>2</sub> applications, Kobelco oil-injected screw compressors provide valuable advantages – including a small footprint, high efficiency, outstanding reliability and tremendous cost savings. But if your application has high pressures or large capacity requirements, the best solution may be centrifugal or reciprocating compressor designs.

The good news? Kobelco offers them all –

including combination packages such as oil-injected/oil-free screw, centrifugal/oil-injected screw and centrifugal/reciprocating. So we can engineer the ideal solution for you.

You have multiple options for CO<sub>2</sub> compression. But for the optimum balance of cost-efficiency, reliability and environmental benefits, the answer is always Kobelco.
